anas-gn
Anas Gana

A Master's student in Networks and Information Systems, seeking a final-year internship (PFE) to further develop my technical skills, apply my knowledge in practice, and contribute to real-world projects in software development and IT systems.

PROFESSIONAL EXPERIENCE

FULL-STACK DEVELOPER **3 months**

Groupe MANAGEM - Remote

- Designed and developed an intelligent platform for data management and exploration.
- Contributed to requirements analysis, system architecture, and the development and deployment of a functional prototype.

FULL-STACK DEVELOPER **5 months**

Sales-uplift - Remote

- Designed and developed a multi-tenant CRM/ERP platform for sales and logistics management in distribution companies.
- Implemented DevOps practices to automate CI/CD pipelines, containerize applications using Docker, and streamline deployment .

EDUCATION

MASTER'S DEGREE IN NETWORKS AND INFORMATION SYSTEMS **2025 - Present**

Faculty of Sciences and Techniques (FST), Settat, Morocco

BACHELOR'S DEGREE IN INFORMATION SYSTEMS AND DIGITAL TRANSFORMATION

Faculty of Sciences and Techniques (FST), Settat, Morocco

ACADEMIC PROJECTS

SPORTS COACHING MOBILE APPLICATION – FLUTTER / EXPRESS.JS / SPRING BOOT / DEVOPS

Developed a multi-sport coaching platform connecting clients, coaches, and partner gyms. Implemented CI/CD pipelines using Jenkins and GitHub Actions, code quality analysis with SonarQube, and application deployment.

COLLABORATIVE PROJECT MANAGEMENT APPLICATION – JAVA / SPRING BOOT

Designed and developed a desktop application for software project management, featuring task management, resource tracking, team collaboration, advanced reporting, and real-time communication.

SKILLS

Strong proficiency in programming languages such as Python, Java, C++, C, and Dart (Flutter). Experience in web development using PHP and frameworks including FastAPI, React.js, Spring Boot, and Next.js. Good knowledge of databases such as MySQL, PL/SQL, and MongoDB, as well as Firebase. Familiar with Power BI, UML modeling, Arduino, and Odoo ERP. Experience with DevOps practices and tools, including CI/CD pipelines with GitHub Actions and Jenkins, containerization with Docker and Kubernetes, code quality analysis using SonarQube, and software development tools such as Git and Postman.
